CERTIFICATE OF CORRECTION

Pg 1026

PATENT NO. : 7,071,557 B2
APPLICATION NO. : 09/388,031
DATED : July 4, 2006
INVENTOR(S) : Salman Akram

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

The title page showing the illustrative figure should be deleted to be replaced with the attached title page.

The drawing sheets, consisting of Figs. 3a, 3b and 5, should be deleted to be replaced with the drawing sheets, consisting of Figs. 3a, 3b and 5, as shown on the attached pages.

(57) **ABSTRACT**

The present invention provides a metallization structure for semiconductor device interconnects such as a conductive line, and methods for making the same, wherein the metallization structure includes a substrate with a substantially planar upper surface, a foundation metal layer disposed on a portion of the substrate upper surface, a primary conducting metal layer overlying the foundation metal layer, and a metal spacer on the sidewalls of the primary conducting metal layer and the foundation metal layer. The present invention also provides a metallization structure and a method for making the same, wherein the metallization structure includes a substrate with a foundation metal layer disposed thereon, a dielectric layer with an aperture therethrough being disposed on the substrate, where the bottom of the aperture exposes the foundation metal layer of the substrate and a metal spacer on the sidewall of the aperture and a line or plug of a primary conducting metal filling the remaining portion of the aperture. These metallization structures are useful for reducing the incidence and severity of thermally induced stress voids.
